## Hand spray unit HSE-2-P

### Product information

#### Flexible, fast and easy lubrication with HSE-2-P

The LBI hand spray unit enables fast and uncomplicated lubrication of tubes and blanks. Thanks to its low weight and easy handling, HSE-2-P can easily be placed exactly where you need it.

For lubrication of pipes, the LBI spray lance is simply connected over the air and medium hose to the HSE-2-P. The 360° nozzle at the end of the spray lance allows pipes from  $\varnothing 12$  mm and up to  $\varnothing 400$  mm to be lubricated easily. The LBI spray lance is available in lengths up to 2000 mm.

Our LBI spray gun is suitable for lubrication blanks. Thin to high viscous lubricants can be applied easily and evenly.

#### Applications

Forming, deep drawing and tube bending  
Strip and blank lubrication  
Internal tube lubrication

#### Advantages

- Clean and flexible spray application
- 40-60% lubricant saving
- Exact adjustable spray patterns
- Uniform spray pattern with high reproducibility
- Easy handling and flexibility
- Thin to high viscous lubricants sprayable
- Low weight

#### Technical Datas

**Tank pressure:** 0,2 - 6 Bar

**Weight:** ca. 4,5 kg (without lance or spray gun)

**Material lance / spray gun:** Aluminium, nickelplated brass and stainless steel
